EDUCATION

University of North Carolina Wilmington *Anticipated 05/2029*
Bachelor of Science in Computer Science | GPA: 3.47/4.00

TECHNICAL SKILLS & CERTIFICATIONS

Security & Analysis: Wireshark, Elastic (ELK Stack), Azure Disk Encryption (ADE), VirtualBox
Programming: Python, Java, JavaScript, TypeScript, C#, SQL, FastAPI, Next.js, Git/GitHub
CAD Modeling: TinkerCAD, AutoCAD, KReaD
Certification: AWS Developer Associate, Cisco Networking Basics, Cisco Introduction to Cybersecurity, IBM Cybersecurity Fundamentals
Languages: English, Korean, Japanese

PROFESSIONAL EXPERIENCE

Cyber Threat Intelligence Intern, Bravo Section | Cyber Security Forum Initiative (CSFI) *08/2026 - Present*

- Conduct OSINT research on North Korean cyber threats from **FBI**, **CISA**, and **MITRE ATT&CK** to analyze CTI research and intelligence reporting.
- Analyze Lazarus Group activities across TTP categories, MITRE ATT&CK techniques, and multiple malware and network artifacts to identify recurring attack patterns.

Undergraduate Research Assistant | UNCW Department of Computer Science *09/2026 – Present*

- Collected and documented scam data using **GitHub**, and analyzed sandbox environments in **VirtualBox**.
- Evaluated multiple **AI-based scam detection** tools by labeling their classifications of scam across **3 stages** to compare detection accuracy and consistency.

RESEARCH EXPERIENCE

Korean-Language PROM Readability Research | Data Analysis & Author *06/2026 - Present*

- Quantitatively analyzed the Korean-language patient-reported outcome measures (PROMs) in the fields of respiratory, cardiovascular, and general health using the **Korean Readability Assessment Tool (KReaD)** to evaluate readability for Korean immigrants.

EXTRACURRICULAR ACTIVITIES

Cyber Defense Club Member | University of North Carolina Wilmington *08/2025 - Present*

- Develop skills in risk management, system security, and network protection through cybersecurity training aligned with the **NIST Cybersecurity Framework**.
- Achieved **5th Place** in **TracerFIRE 14** competition to solve hands-on CTF challenges involving digital forensics, network analysis, and incident response.

Full-Stack Developer *09/2025 - 09/2026*

- Deployed a full-stack cybersecurity career intelligence platform using **Next.js**, **TypeScript**, **Python**, and **FastAPI**, with a Vercel **frontend** and Render **backend**.
- Integrated automated resume analysis, **Adzuna**-powered cybersecurity job discovery, security-role fit assessment, and application tracking into a unified workflow.

Hand Helping Project Member | Wilmington Chapter *08/2025 - Present*

- Designed and 3D-printed custom prosthetic hand components for children with disabilities using **TinkerCAD** and **AutoCAD**; selected as the sole recipient of the **Innovation Design Award**.
- Prototyped and tested iteratively with a team to improve ergonomics, safety, and usability based on user feedback.

Game Development *01/2024 - Present*

- Programmed core gameplay systems, mechanics, and UI in **Unity** for 10+ original games, which were featured by popular live streamers, and enhanced gameplay through community feedback.
